

İLKOKUL DOKÜMANLARI

MATEMATİK ETKİNLİKLERİ

KESİRLERLE İŞLEMLER

Adı Soyadı : _____

A. Aşağıda modellerle gösterilen kesirlerle çıkarma ve toplama işlemlerini yapalım.

B. Aşağıda verilen kesirlerle toplama ve çıkarma işlemlerini yapalım.

$$\frac{3}{6} + \frac{2}{6} =$$

$$\frac{3}{7} + \frac{4}{7} =$$

$$\frac{4}{5} - \frac{2}{5} =$$

$$\frac{9}{8} - \frac{5}{8} =$$

$$\frac{3}{4} + \frac{5}{4} =$$

$$1\frac{2}{6} + 2\frac{1}{6} =$$

$$\frac{11}{9} - \frac{5}{9} =$$

$$2\frac{4}{5} - 1\frac{3}{5} =$$

C. Aşağıda verilen kesirlerle toplama ve çıkarma işlemlerini modelleyelim.

$$\frac{2}{4} + \frac{1}{4} =$$

$$\frac{5}{6} - \frac{4}{6} =$$

$$\frac{4}{5} + \frac{3}{5} =$$

$$\frac{11}{8} - \frac{7}{8} =$$

$$1\frac{3}{6} + 1\frac{2}{6} =$$

$$2\frac{5}{8} - 1\frac{3}{8} =$$

D. Aşağıda verilen kesirlerle işlemleri yapıp sayı doğrusunda gösterelim.

$$\frac{2}{5} + \frac{1}{5} =$$

$$\frac{3}{4} - \frac{1}{4} =$$

$$\frac{5}{6} + \frac{4}{6} =$$

$$\frac{11}{6} - \frac{8}{6} =$$

$$1\frac{2}{4} + 1\frac{1}{4} =$$

$$2\frac{4}{5} - 1\frac{2}{5} =$$
