4.SINIF MATEMATİK  
5 İLE KISA YOLDAN ÇARPMA

ETKİNLİK-2

**Strateji:** Bir sayıyı 5 ile kısa yoldan çarpmak için sayıyı ikiye böler 10 ile çarpırım. Tek sayıları ise önce 10 ile çarpıp sonra ikiye bölerim.

**Örnek:**

$$44 \times 5 = \blacksquare \longrightarrow 44 : 2 = 22 \longrightarrow 22 \times 10 = 220 \longrightarrow \blacksquare = 220$$

Aşağıdaki çarpma işlemleri örneğe uygun olarak kısa yoldan yapınız.

$$24 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$28 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$56 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$34 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$86 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$94 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$54 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$76 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$22 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$18 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$64 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$50 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$

$$98 \times 5 = \blacksquare \longrightarrow \dots : \dots = \dots \longrightarrow \dots \times \dots = \dots \longrightarrow \blacksquare = \dots$$
